

WELCOME TO THE HEALTHMUN MAILING LIST !

## Next Workshop (4/1)

### A NOTE FROM THE COMMUNICATIONS BOARD

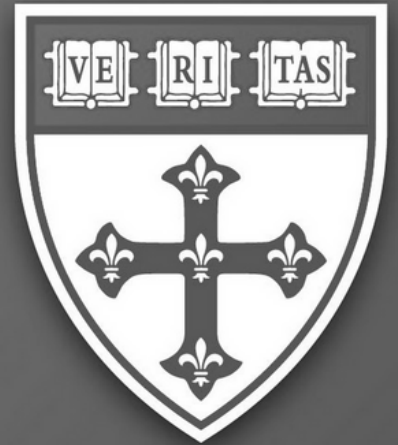

Hello HealthMUN! Tejas here! Thank you all for coming again for the Workshop this Monday! We were thrilled with the turnout, and a special thank you to Sirad Hassan for her presentation! If you weren't able to make it, the [Slides](#) AND the [Zoom Recording](#) are both posted below!

Our next Workshop is planned for **Monday, April 1st, at 9 PM!** We will continue Sirad's discussion from yesterday's Workshop about things that can be done to address the crisis in Somalia more effectively. We will also introduce new MUN terms! Please use the slides, recordings, and all the resources you can find to prepare yourself for next week's Workshop. We can't wait to see what you guys have to discuss!

Best,  
Tejas Jadar  
Communications Board Staff

presented by Sirad:

**"FROM  
HISTORICAL  
STRUGGLES TO  
TODAY'S  
EMERGENCIES:  
CHARTING THE  
COURSE OF  
PUBLIC  
HEALTH IN  
SOMALIA"**

**"It is unconscionable that Somalis, who have done almost nothing to create the climate crisis, are suffering its terrible impact,"  
– Guterres, Secretary-General of the UN**

# Public Health in Somalia

## A RECAP OF LAST WORKSHOP

Here's a little information about the guest speaker and her topic:

Our Guest Speaker:

Monday's workshop featured our guest speaker, Sirad A. Hassan, a Population Health Sciences doctoral student in the Department of Social and Behavioral Sciences at Harvard T.H. Chan School of Public Health, who started a deep water well project in Somalia with PennyAppeal UK. She is passionate about giving access to basic humanitarian needs to the people of Baidoa, Somalia.

Workshop Topic:

In 2023, Somalia was one of the top countries on the International Rescue

Committee's Emergency Watchlist due to the devastating drought that affected many parts of the nation. This calamity, in combination with the decades of civil conflict and unrest in Somalia, has also led to a catastrophic food crisis. Additionally, lack of access to clean and safe water has exacerbated incidences of water-borne diseases. Climate change continues to negatively impact Somalia's ability to achieve food and water security. We aim to provide thought-provoking questions to deepen your understanding of the Somalian crisis and ponder methods to fight these issues.
